### Please Note:

- Can run 3, 4, or 5 days a week. Pick up where you've left off and you'll do fine.
- Do a couple of tune up races before the half marathon to get used to dealing with race day nerves.
- Recovery weeks are built in to improve your chances for staying healthy and recover enough for race day.

### Quick Reference Guide

**Endurance Phase:** main goal is to slowly build up endurance. Avoid speed work / very little hills.

**Strength Phase:** to add strength by doing one hilly course a week.

**Taper Phase:** to allow your body to recover and peak for the target race.

### Key Terms

**O** = Off Day/Complete Rest/ No cross training. Active recovery such as foam rolling recommended.

**C** = Cross training. Strength training that works the glutes/hipa/core is recommended 1-3 times a week. Can also do non-weight bearing aerobic activities that you enjoy such as aqua jogging, swimming, or spinning.

**R** = Recovery Workout. Very relaxed effort over flat to rolling terrain or off the pavement for short duration. Stop every 10 minutes during the run to stretch and muscle floss to loosen up tight spots. Have fun!

**SL** = Semi-long Workout. After a 1-2 mile warm up (very relaxed effort), settle into conversation effort.

**L** = Long Workout. After a 2 mile warm up (very relaxed effort), settle into conversation effort.

**H** = Hill Workout. After 1-2 mile warm up, do a hillier than average route at conversation effort or for a more concentrated workout, do hill repeats. Start with 2-4 minutes of 'climb' time and add 1-2 minutes each week.

**F** = Fartlek. After you've warmed up, perform pickups during the workout where you run at 5K-10K race effort (i.e. moderately hard) for 1 minute followed by a 2 minute recovery jog. Start with 2-4 and add 1 every week.

**+** = And Optional. C+R means to cross train with the option of also doing a recovery workout.

**/** = Or. C/O means to either cross train or take the day off.
